SUMMARY

Aspiring AI Software Engineer, passionate about building intelligent systems and leveraging cutting-edge tools to create impactful solutions. With a strong foundation in software engineering and a hands-on approach to emerging AI technologies, I focus on turning ideas into functional, scalable products.

EDUCATION

Superior University

Bachelors of Computer Science in Computer Science

Lahore, Pakistan

Mar 2024 – Present

PROJECTS

Jarvis

Python

- Developed a voice-controlled AI Virtual assistant powered by Google Gemini, capable of smart conversations, web control, weather/news updates, and YouTube playback.

Whatsapp Auto Reply Bot

Python

- Created software that automates WhatsApp messaging by reading chat history and replying using Google Gemini AI with PyAutoGUI.

Spotify Music Interface

HTML, CSS, JavaScript

- Built a fully responsive Spotify-inspired web application featuring a dynamic music player interface and a modern, card-based UI layout.

Student Performance Analysis

Python, Jupyter Notebook

- Conducted a beginner data analysis project using Python, Pandas, NumPy, and Matplotlib to analyze academic performance trends.
